

Mega CS

PREVENTION. PROTECTION. PEACE OF MIND.

high-security seal

High Security Container Seal

1. The metallic pin and bush of the Mega CS is made of high-carbon steel which gives better strength and added security.
2. The pin and bush is moulded with high-impact ABS material. The special high-resilient ABS material does not break easily but will clearly show evidence of tampering.
3. The Mega CS is etched with permanent laser marking for name, logo, sequential numbers & barcode. Laser marking offers the highest level of security as it cannot be removed and replaced.
4. Identical sequential numbers etched with laser technology on both barrel and bolt to prevent replacement of parts.
5. Available with a transparent plastic cover that protects the marking on the barrel.

Specifications

Product	Material	Pin Length	Bolt Diameter	Pull Strength	Marking Area	Max Marking Digits
Mega CS	ABS with High-carbon steel pin & bush <i>"metal parts meet the ISO 17712 requirement of 18mm min diameter"</i>	85mm	Ø 11 mm	2,200kg	Pin: 17mm x 5mm Barrel: 25mm x 13mm	8
	Carton Quantity	Dimensions	Weight kg/carton	Volume m³/carton	Standard Colours	
	250 pcs	362mm x 222mm x 215mm	17.15	0.01728	blue, green, red, yellow & white	

High Security Container Seal

Unlike the majority of bolt seals, the Mega CS locking mechanism is embedded in a groove in the metal bush, making the seals stronger and more difficult to tamper.

Typical applications of the Mega CS include shipping and intermodal containers. The Mega CS is also widely used for ground transportation.

Be assured of better security with our innovative use of materials and industrial design.
