INDICATIVE SEAL

MINI CABLE LOCK PREMIUM 150 New Version
(MCLP 150 NV)

Pull-Tight Barrier Seal

Delicate premium seal for security requirements.

Mini Cable Lock Premium 150 New Version is delicately designed with various tamper-evident features in a small-sized seal. The seal is durable and versatile for indicative security application. Its space saving size makes it ideal for identification and authentication purposes. These seals include the BioSphere bio-additive.

To provide eco-conscious solutions on a wide array of applications, all Mega Fortris' security seal product lines with plastic content will include the BioSphere bio-additive from 13th May 2024.
Applications:

● Authentication Tagging   ● Evidence Securing   ● Retail Applications   ● F&B Applications

BIODEGRADABLE
Additives Enhanced

Our biodegradable plastic additives go deeper, allowing microbes to consume the C-C bonds within plastic's structure at a macromolecular level. This increases the surface area of plastic products and enables plastophilic microbes to attach to the polymer's newfound cavities. So, unlike regular plastic that can sit in a landfill for hundreds or thousands of years, plastic enhanced with BioSphere attracts over 600 different types of microbes that effectively digest and consume it.
PREVENTION · PROTECTION · PEACE OF MIND

CABLE SEAL

1   The Mini Cable Lock Premium 150 New Version is moulded with high-impact PP material with non-preformed galvanised steel wire to show clear evidence of tampering.

2   One-way locking mechanism is embedded for fast and easy application. The additional tips at both ends provide greater protection.

3   Irreversible identifiers such as name, logo, barcode, serial number and QR code are laser-marked on the body.

4   Biodegradable additives for plastic material are available.

5   The exposed wire press area serves as a tamper-evidence feature, indicating that the wire is securely locked in place and protecting the product from any attempts at pre-tampering.

6   Plastic body material can withstand extreme weather conditions of -20°C to 80°C.

7   These seals include the BioSphere bio-additive.

TECHNICAL SPECIFICATIONS

Customisable cable length upon request.

PRODUCT - MINI CABLE LOCK PREMIUM 150 NEW VERSION (MCLP 150 NV)

Code	Material	Locking Length	Locking Size	Tensile Strength	Marking Area	Max Marking Digits
