

KLICKER / I-KLIC → LOCKING PROCEDURE

Diagram A

Diagram B

Diagram C

Diagram D

STEP 1

Detach the pin from the locking chamber by breaking the connecting bridge, as shown in Diagram A

STEP 2

Insert the pin directly into the locking chamber & press to lock the seal, as shown in Diagram B.

STEP 3

Finally, slightly pull back the pin outwards to confirm that the seal is locked properly, as shown in Diagram C.

STEP 4

To remove the seal, use a bolt cutter and cut at the pin shaft, as shown in Diagram D. For safety purpose, ensure proper protective equipments are worn while removing the seal.
